

Expression of interest in collaborating as a partner on Horizon Europe calls

On behalf of **Jana Vyrastekova** from Radboud University, we would like to express interest to cooperate as **a partner** in the following areas of Horizon Europe. More information about researcher and institute can be found below. For questions or remarks, please email collaborate@ru.nl.

Cluster: 2. Culture, Creativity and Inclusive Society

Looking to join a Consortium on the topics on cooperation, trust, civic behaviour, education, namely:

HORIZON-CL2-2022-DEMOCRACY-01-04: Education for democracy

HORIZON-CL2-2022-DEMOCRACY-01-03: The impact of inequalities on democracy

Brief description of contribution as a partner:

I would like to offer my skills of an experimental economist to design and implement incentivized experiments with the goal to demonstrate the causality between variables of institutional or organisational design and behavior, such as trust, cooperation, truth-telling (and many others). I am a versatile interdisciplinary researcher in social sciences, and although methodologically, I am grounded in economic decision theory, I incorporate broad insights from neurocognitive, psychological and other research to design my studies.

Relevance of expertise/previous research:

Gelijke Kansen in Onderwijs – Equal chances in education: research project on inequity in education (experiments with children)

Cognitive depletion and decision-making – experiments addressing the impact of scarcity on behavior

REFLECT for self-regulated learning – design of intervention promoting self-reflective practices in students at a university

Jana Vyrastekova

Is experimental and behavioral economist, with expertise on conducting online, laboratory and field incentivized experiments using game theoretic models to capture tradeoffs of incentives in human behavior. She has run projects on gender and social norms in developing countries, collected data in elementary schools in experiments with children, and engaged with professionals about their professional norms (e.g. entrepreneurs, teachers). Her core research area is on the impact of social inclusion on behavior, inclusive the willingness to cooperate and trust individuals, groups and institutions. She also has knowledge of behavioral insights for policy making, including, but not exclusively captured by, nudging of human behavior. [More information](#).

Radboud University:

Radboud University and Radboudumc have been actively involved in EU Framework Programmes, having coordinated 265 projects (including FP7, H2020, Erasmus+ and 3HP programmes).

The organisations together secured funding for 268 FP7 projects (including individual and collaborative research) from 2007 to 2014. Between 2014 and 2020, Radboud University and Radboudumc received more than 200 million EUR from the European Commission for 285 research and innovation projects, making it to top three Dutch organisations with highest net EU contribution in Horizon 2020.

Radboud researchers are particularly successful in ERC and MSCA grants as well as projects with European consortia covering the topics of Health, Climate Action, Future and Emerging Technologies, ICT, Food Security, Biotechnology, Transport, Energy, Space and Security, Inclusive and Reflective Societies, Nanotechnologies, Advanced Materials and Research Infrastructures.
