The following topics will be discussed:

- General requirements of the call (Dr Katarzyna Skowrońska-Dzierzba)
- Support you can expect from the University Grants Office (Dr Katarzyna Skowrońska-Dzierzba)
- The main elements of an MSCA Postdoctoral Fellowship proposal (Jowita Chojcan)
- Tips for the proposal template and layout (Jowita Chojcan)
- Tips for the organisation of text and the language to be used (Jowita Chojcan)
- What makes a good "1.Excellence" section ? (Dr Tomasz Hadaś)
- "2. Impact" section – what types of impact you should focus on? (Dr Tomasz Hadaś)
- How to plan the communication and dissemination activities ? (Dr Tomasz Hadaś)
- 3. Implementation and the Gantt chart (Dr Tomasz Hadaś)
- Part B2 – how to make it consistent with B1 (Dr Tomasz Hadaś)
- Q&A

The 2021 call for MSCA PF is expected to open shortly. It is going to be a busy summer for you.

Let us help you understand the forms and three evaluation criteria: (1) excellence, (2) impact and (3) quality and efficiency of the implementation.

You need to work closely with your supervisor as it is generally recommended that the proposal is submitted by her/him using the host organisation's PIC number.

Your trainers are:

**Dr Katarzyna Skowrońska-Dzierzba** – who works at the University's Grants office – and will support you and your supervisor in grant preparation. She will provide you with all the information related to the University and general grant requirements.

**Jowita Chojcan**, Horizon Europe programme expert, who has provided support in grants writing for many years. Her main expertise lies in individual grants awarded by the EU and other international grant agencies. As part of the network of National Contact Points that offers support to researchers applying for EU funding, she is responsible for providing grant support (incl. Euraxess) in the Lower Silesia region of Poland.

**Dr Tomasz Hadaś** - a post-doc at the Institute of Navigation in Stuttgart and associate professor at the Wroclaw University of Environmental and Life Sciences. His main scientific interest is satellite geodesy. He has been an MSCA fellow since 2019 and previously received scholarships from the Polish Ministry of Science and Higher Education for outstanding achievements as a young scientist. He has plenty of experience in research projects and serves as a technical officer for the European GNSS Agency (GSA).
